

INDRAJEET RAJ

Software Engineer | Full Stack Developer

India · 📞 +919936566414 · indrajeetraj2809@gmail.com · [LinkedIn](#) · [GitHub](#) ·

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, JavaScript, SQL

Backend: NodeJS, NestJS, ExpressJS, REST APIs

Frontend: React.js, Next.js, HTML, CSS, TailwindCSS, Redux Toolkit

Databases: PostgreSQL, MongoDB, MySQL

Cloud & Tools: AWS, Docker, Git, GitHub, Postman

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Computer Network, Operating System

EXPERIENCE

Software Engineer | SoftxAI Technology Pvt. Ltd.

Hyderabad, India | May – October 2025

- Developed scalable backend APIs and business logic using **NestJS**, **TypeScript**, and **PostgreSQL**, following clean coding practices and designing **microservices architecture** for modular, maintainable service deployments.
- Migrated legacy **Python modules** to **NestJS** for individual service repositories, rewriting core logic and optimizing database operations with **raw SQL** instead of ORM, resulting in approximately **40% faster API response times**.
- Implemented **cron jobs** to process over 300,000 business records for services expiring or about to expire, handling batches of 200 companies at a time, retrying failed batches, and completing tasks within 10–30 seconds to avoid CPU overload.
- Wrote and maintained **unit and integration tests** using **Jest**, covering controllers, services, and database layers, achieving **85%+ test coverage** and ensuring reliable, production-ready deployments.

PROJECTS

AI Interview Prep System (Node.js, MongoDB, JWT, Gemini-API, CORS, Deployment)

GitHub — Live

- Developed a full-stack AI-powered interview preparation platform using React, Node.js, Express, and MongoDB. Implemented secure authentication using JWT with HTTP-only cookies, handling cross-origin (CORS) and cookie security in production.
- Integrated Google Gemini API to generate dynamic interview questions, evaluate answers, and create resume-based questions using optimized prompts.
- Designed and implemented role-based access control (Admin/User) with protected routes.
- Deployed the application on Vercel (frontend) and Render (backend) with proper environment configuration.

Food Delivery Web App

GitHub — Live

- Designed and built a full-stack food ordering platform using ReactJS for the front-end, Node.js/Express for the back-end, and MongoDB for the database. Key features include browsing menus, placing orders, real-time order tracking, and secure user authentication.
- A robust user authentication to ensure secure access, allowing all users to view posts, like and leave comments.

EDUCATION

University Institute Of Engineering and Technology (UIET)

2021 – 2025

B.Tech in Computer Science & Engineering (CSE)

Kanpur, Uttar Pradesh

ACHIEVEMENTS & CERTIFICATIONS

- **LeetCode:** Solved **150+ problems** — [Link](#)
- **SoftxAI Internship:** Successfully completed internship at SoftxAI — [Link](#)
